

BATECO VINYL

Application

Bateco decking protects indoor and outdoor sports floors when being used multifunctional.

A sports floor is often used for other purposes such as exhibitions, parties, events, etc. Bateco decking consists of strips 1.5 metres wide and can form a seamless protective surface.

Properties

Bateco protects your sports floor from edge to edge against humidity, dirt and damage.

Laying the mats

Bateco vinyl mats are delivered on roll. These mats can easily be rolled out side by side.

They are then taped with specially designed tape that leaves no glue residues.

We handle pickup and delivery, and can also see to the installation, dismantling and final cleaning upon request.

Deliveries

We supply Bateco on rolls in specially designed containers.

Environmentally friendly, durable and economic

Bateco is made of 100% recycled rubber and can be recycled again once discarded after extensive use.

It has been common practice up to now to use wood or wood by-products for the above-mentioned purposes. Bateco helps us conserve our natural resources.
